## The perfect choice for producing professional-quality discs

Primera's Disc Publishers for CD, DVD and Blu-ray Disc™ media are ideal for producing single unique copies or large quantities of professional-quality burned and printed discs – automatically and hands-free. Use Disc Publishers to create CDs, DVDs or BDs of your:

- **Product catalogues**
- **Software releases**
- **Training videos**
- **Tradeshow handouts**
- **Press kits**
- **Original music and much more!**
- **High-definition video**

The range of disc publishing systems are ideal for small to large businesses and organizations including

- **Government and military**
- **Medical records and imaging systems**
- **Banking, insurance, back-up and archival**

Make a positive, lasting impression with Primera's Tuff-Coat™ with WaterShield™ surface discs. Water-resistant media are fast-drying, smudge- and smear-resistant, custom graphics won't wash away and the discs look truly professional.

Primera is a member of the Blu-ray Disc Association and is the world's first manufacturer of automated disc publishers to announce support for Blu-ray Disc technology.

**PRIMERA**  
TECHNOLOGY, INC.

People Who *i*nnovate™

Primera's "all-in-one" disc publishing models combine fast, automated precise robotic CD/DVD/BD duplication along with full-colour, 4800 dpi direct-to-disc printing. That's the highest printing resolution available from any manufacturer of disc publishers – in fact, almost four times higher than a leading competitor.

From initial set-up to full operation, Primera's Disc Publishers are easy to use because of the simple but powerful wizard-style publishing software that's included for both Windows-based PCs and Mac systems. The built-in disc design software lets you place photos, backgrounds, text and graphics anywhere on the disc, including as far into the middle of the disc as you wish. Simply specify the files you want to burn and print, select how many discs you'd like, and press "Go!".

All Disc Publisher models may also be ordered with the latest-generation Blu-ray Disc recordable drives. Both 25 GB single-layer and 50 GB dual-layer discs are supported.
