Small All-In-One Rewinder and Motorized Unwinder Series for PRIMERA® LX400

Model SUAP

Small All-In-One Unwinder with adjustable core holder

Model SRAP

Small All-In-One Rewinder with adjustable core holder

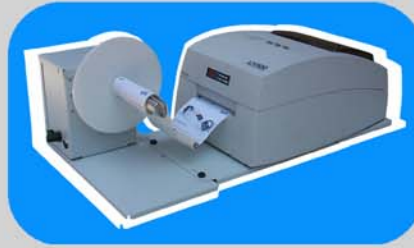

Model SU1P

Small All-In-One Unwinder with fixed core holder of 1 inch

Model SR1P

Small All-In-One Rewinder with fixed core holder of 1 inch

Small All-In-One Rewinder and Motorized Unwinder Series has been specifically designed for Primera LX400. All the models can handle labels up to 120 mm wide, they can rewind/unwind rolls of labels with diameter up to 170 mm and they have a speed of 120 rpm. Both for the rewinder and unwinder it is possible to have two different types of core holder: the adjustable core holder from 46 mm up to 76 mm or the core holder 1 inch.

By selecting the models better fitting your needs you can create the rewinder and unwinder kit for your LX400. The machines have an external power supply of 220/18 Vac and an electronic circuit controls all the functions. The plate of the machines was designed so that the printer can be laid on it in order to guarantee correct stability and alignment. This allows the printer to avoid any possible overturn or interference.

The tension arm adjusts the sense and the speed of rotation both on the rewinder and the unwinder. The obtained roll will have the labels face out only. When the roll of labels runs out, the device stops thanks to the contact between the tension arm and the plate. An acoustic signal sounds to let you know the roll is finished.
