Small Rewinder Series

Model **SRA**

Small Rewinder
with adjustable core holder

Model **SR1**

Small Rewinder
with core holder of 1 inch

Small Rewinder Series is available in two different models: SRA and SR1. The model SRA has an adjustable core holder from 46 mm up to 76 mm, while the Model SR1 has a core holder of 1 inch. Both models can handle labels up to 120 mm wide and they can rewind rolls of labels with diameter up to 170 mm. Both models have a speed of 120 rpm

Small Rewinder Series can be used with any type of label printer

The rewinder has an external power supply of 220/18 Vac and an electronic circuit controls all the functions. When the roll of labels runs out, the rewinder stops by uttering an acoustic signal.

The possibility to adjust the sense of rotation, clockwise or counterclockwise, allows to rewind the labels face in or face out. The tension arm adjusts the speed of rotation and when it is down, the rewinder turns at full speed, while when it is up, the rewinder is idle and it blocks the motor's rotation when the printer stops.
